Map View and Layers

When viewing a Property Report, select the View Larger Map link to see a more detailed view of the property's surrounding area. Map aps provide a variety of layers and tools that give you additional information about that area like recent sales, foreclosures, listings, and more.

Layers

Let's take a detailed look at the layers available to you. Start by selecting Map Layers in the upper left corner to see your options.

Parcels

Show or hide the parcel (property boundary) lines on the map.

Real Estate & Financial Information Since 1872

Recent Sales

Highlight properties that have sold within certain timeframes by turning on or off recent sales layers.

Measurements

If you have measured anything on the map using the tools below, you can turn off those measurements using this switch.

Searches

If you have drawn any shapes (rectangle, radius, or polygon) on the map, you can hide the shapes by turning off the Searches layer.

Subject Property

Show or hide the icon that indicates the subject property. This is the property you were viewing when you selected to view the large map.

Real Estate & Financial Information Since 1872

Tools

On the right side, you'll find a set of tools to help you create exactly the right map view.

Zoom in and out

Select the plus sign to zoom in and the minus sign to zoom out.

Map view

Select the gear icon to see different types of maps, Road, Aerial, and Birdseye. When in Birdseye view you will see the arrow icons shown in the image below, use these to rotate the map view.

Compass icon

The compass icon shows you the direction the map is facing. The orange arrow points north. When in Birdseye view, your view can be rotated, this is how you'll know the current map view's orientation.

"You are right, it doesn't do anything. Its purpose is to show which direction you are facing. If you switch to the Birdseye view then you are given two additional buttons to rotate the image. Again the actual icon doesn't do anything though."

Real Estate & Financial Information Since 1872

Re-center on subject property

If you have moved the map and would like to quickly re-position it back to your subject property, just select the map location icon (shown below).

Measuring Tool

To measure distances on the map, select the ruler icon and choose the measurement type you need.

Lat/Long

Use the Lat/Long option to see map coordinates. Once you choose this option, move your pointer to the spot on the map you need to measure, then click or tap once. A box will appear giving you the coordinates. select Delete to remove it or Move to choose a new spot on the map.

Real Estate & Financial Information Since 1872

Distance

To measure a distance, select the ruler icon and choose Distance. Click or tap on your starting point, then move the red line to any other point on the map to see how far apart they are. Double-click or tap at your end point to finish your measurement.

Area

Select the ruler icon then Area to measure the area of the map. After choosing the Area tool, click or tap on your starting point, move the red line to the next point on the edge of your area, the click or tap again. Continue adding connecting lines in this manner until you close off the area to be measured. Double-click or tap to finish your measurement. The acreage will be shown in the middle of your selection.
